

A Message from the Chairman

While socioeconomic activities are normalizing during recovery from the Covid-19 pandemic, inflation and monetary tightening measures taken by each country are among the factors which threaten to slow the global economy. In Japan, there are unresolved pre-pandemic structural issues, such as population decline combined with the falling birthrate and the aging population, and regional revitalization issues, and economic growth is sluggish.

In addition to promoting a smooth structural transition of economic society to overcome current problems, it is important to put the economy of Central Japan and the country on a

higher growth path toward the future.

The Central Japan Economic Federation, known as Chukeiren, features the three "creation" goals—creation of added value, creation of human capital, and creation of a region full of charm, which are set forth in the Chubu Economic Federation Mid-Term Action Guidelines, ACTION 2025. These guidelines were established in June 2021 to cover the years up to 2025. Chukeiren is advancing activities to improve regional strength through the cooperation of industry, academia, government, and local areas.

Building on its activities thus far, Chukeiren will accelerate its efforts to help Central Japan make a leap by further specifying the target activities.

One such target is our focus on regional revitalization. Important factors are the formation of a Super Mega Region, and the formation of next-generation travel and transport industries resulting from the opening of the Linear Chuo Shinkansen. Also a part of our mission are the realization of a carbon neutral society, the activation of innovation, and the development of an environment where diverse human resources can prove themselves. We pay particular attention to these themes. Additionally, considering that we are now at a major turning point in social and economic trends, Chukeiren will identify Central Japan's future direction, and will consider and develop activities to make it a reality.

As a wide-area general economic organization, the role of Chukeiren is to connect local stakeholders and regional resources to develop and expand their potential and contribute to added value for the region.

Chukeiren will contribute to the sustainable development of Central Japan, as well as that of Japan, through collaboration and co-creation with stakeholders. Your support and cooperation would be very much appreciated.

Akihisa Mizuno, Chairman Central Japan Economic Federation (Honorary Advisor, Chubu Electric Power Co., Inc)

History

1951	Apr.	Central Japan Economic Federation ("Chukeiren") was established		
1957	Mar.	"5-year Plan for Central Japan's Economies" was published, proposing to invite an integrated		
		steel maker to the Ise Bay area		
1958	Aug.	Chukeiren's efforts led to the establishment of Tokai Seitetsu K.K.		
		(now Nippon Steel Corporation Nagoya Works)		
1963	Apr.	"Framework for Integration of Three Tokai-region Prefectures" was published		
1969	Dec.	"Framework for Building an International Cargo Airport" was published		
1982	Apr.	30th Anniversary celebration was held. "Vision of Central Japan for the 21st Century" was published		
1985 Feb. "San-en-Nanshin (Eastern Aichi, Western Shizuoka, Southern Nagano) Triangle Framework"				
	was published			
	Apr.	Japan Fine Ceramics Center was established		
1991	Feb.	The International Center for Environmental Technology Transfer was established		
	May	Chukeiren was converted to an incorporated association in order to consolidate its operational foundation		
1998	May	Central Japan International Airport Co., Ltd. was established		
2001	Nov.	50th Anniversary ceremony was held. "Direction of Central Japan in the 21st Century" was published		
	Nov.	Central Japan International Airport Promotional Council was established		
2002	Jun.	"21st Century Council for Building the Future of Central Japan" was established		
2005	Feb.	Chubu Centrair International Airport opened for operation		
	Mar.	The 2005 World Exposition, Aichi, Japan was held		
	Oct.	Greater Central Japan (Tokai, Hokuriku, Shinshu) Tourism Promotional Council was established		
2007	Apr.	Nanostructure Research Lab (Nano Technology Center) was established within the Japan Fine		
		Ceramics Center		
2010	Oct.	10th Meeting of the Conference of the Parties (COP10) to the Convention on Biological Diversity was held		
2011	Nov.	60th Anniversary celebration was held		
2012	Jan.	The Shoryudo Project was launched		
	Apr.	Chukeiren converted to a general incorporated association		
2017	May	Established a regional collaboration DMO, the Central Japan Tourism Association		
		(reorganized the Greater Central Japan Tourism Promotional Council expansively)		
2019	May	Central Japan Innovation Initiative was established		
	July	Nagoya Innovator's Garage was launched		
2021	Jun.	70th Anniversary ceremony was held. Mid-Term Action Guidelines ACTION 2025 was published		
2022	July	Expansion of Nagoya Innovator's Garage		

Central Japan Economic Federation (Chukeiren) at a Glance

Establishment	April 2, 1951
Area of Activity	5 prefectures in Central Japan including Nagano, Gifu, Shizuoka, Aichi, and Mie
Members	Approx. 760 enterprises, educational corporations, and economic organizations in Central Japan
Activities	Central Japan Economic Federation, known as "Chukeiren", is a comprehensive economic organization covering a wide area including 5 prefectures in Central Japan. Chukeiren conducts surveys and studies on social and economic issues in and outside of Central Japan, compiles opinions of businesses in the area, and submits recommendations and engages in various activities to achieve goals.
	Chukeiren works with the national and local governments as well as relevant agencies to execute a wide spectrum of projects, such as the "Opening of Chubu Centrair International Airport", "Hosting the EXPO 2005 AICHI JAPAN", "Establishment of Nanostructure Research Lab", "Support to Attract and Host the 10 th Meeting of the Conference of the Parties (COP10) to the Convention on Biological Diversity", and "Establishment of Nagoya Innovator's Garage".

Committees

In order to address issues of industry and economy within and outside of Central Japan, Chukeiren has established twelve committees and a council to conduct surveys and studies, make recommendations, and engage in various other activities.

Economy	 Conduct surveys and studies, submit recommendations and requests, and engage in promotional activities in the area of economic policies, social systems, economic laws and regulations, etc. Formulate a Visionary Policy to put the economy of Central Japan on a higher growth path toward the future
Taxation Systems	Conduct surveys and studies, submit recommendations and requests in the area of taxation reform and subsidies which would benefit industrial development and promotion
Industry and Technology	 Conduct surveys and studies, submit recommendations and requests, and engage in promotional activities to support advancement and promotion of next-generation capacity for travel (including advances in air travel and transport) and conduct surveys and studies on new industrial fields Promote surveys and studies and activities for the construction of an industry-academia joint research frame
Energy and Environment	Conduct surveys and studies, submit recommendations and requests, and engage in promotional activities in the area of energy and environmental protection including decarbonization and circular economy
Innovation	 Conduct surveys and studies, submit recommendations and requests, and engage in promotional activities to accelerate innovation and create new industries Enhance the functions of innovation and startup in Central Japan
International	 Conduct surveys and studies, submit proposals, and engage in promotional activities to enhance the global competitiveness of industry Conduct surveys and studies, submit proposals, and engage in promotional activities to promote the active participation of foreign human resources and realize a multicultural society
Promotion of Local Communities	 Consider regional revitalization measures through member-relevant agency collaboration Conduct surveys and studies, submit recommendations and requests and promote activities on community development and vitalization of industries which support the region
Tourism	Conduct surveys and studies, submit recommendations and requests, and engage in activities to promote tourism
Social Infrastructure	Conduct surveys and studies and submit recommendations and requests to develop a comprehensive transportation network
Corporate Disaster Prevention and Mitigation	Conduct surveys and studies, submit recommendations and requests, and engage in promotional activities in the area of disaster prevention and mitigation by the business communities
Logistics	Conduct surveys and studies, submit recommendations and requests on the ideal approaches for logistics that contribute to reducing greenhouse gas emissions and dealing with labor shortages
Human Development	Conduct surveys and studies, submit recommendations and requests, and engage in promotional activities in the area of development of human resources, etc. which support the region and local industries

Mid-Term Action Guidelines, ACTION 2025 (established in June 2021) are guidelines that depict our future vision for Central Japan in around 2030 to 2040 and summarize the activities that Chukeiren will work on up to 2025 to realize it.

As a "Chukeiren that gathers resources and breaks through," Chukeiren will break through hurdles that might block the growth of the region together with its members and industry, academia, and government in Central Japan in accordance with Mid-Term Action Guidelines ACTION 2025 and will work to sustainably improve the regional strength that is vibrant and draws people to it of Central Japan.

Future vision for Central Japan (around 2030 to 2040)

A region where industries that create high added value continuously grow

•Creation of industries that create high added value through the activation of innovation •Revitalization of the regional economy by improving the productivity of local industries and the activation of innovation

Acceleration of activities to realize a carbon neutral society

2 A region where diverse, talented human capital play active roles and that attracts people from Japan and abroad

•Diverse, talented human capital from a wide range of generations, regardless of gender, play active roles •Creation of charm to attract people from Japan and abroad, such as industries that produce high added value and comfortable environments to work and live in

3 A region that develops sustainably through the activation of further cooperation

- •Improvement of local charm and vitality and improvement of the regional strength of all of Central Japan through the cooperation of industry, academia, government, and local areas
- •Building of a convenient wide-area transportation network with redundancy and improvement of safety and security through the building of national resilience

Basic concepts of Mid-Term Action Guidelines ACTION 2025

- The five-year period starting in 2021 will be positioned as the first stage of Chukeiren' s activities to improve the regional strength of Central Japan and overcome not only domestic but also global competition.
- The role of Chukeiren is to connect local stakeholders and resources in the region through the cooperation of industry, academia, government, local areas, and other interested parties to develop and enrich their potential and increase local added value.
- To increase the regional strength of Central Japan by playing this role, Chukeiren will conduct activities based on eight guidelines, with three "creation" goals—creation of added value, creation of human capital, and creation of a region full of charm—as their pillars.

Mid-Term Action Guidelines ACTION 2025

Creation of added value	Guideline 3	Work on early recovery of the economy weakened by the COVID-19 pandemic Work on the creation and development of industries that produce high added value and the acceleration of digital transformation Strive to improve the productivity of local industries and the activation of innovation and work on revitalization of the regional economy Work on activities to realize a carbon neutral society
2 Creation of human capital		Work on the cultivation of human capital that can exercise a wide range of abilities Work on the development of comfortable environments to work and live in
3 Creation of a region full of charm	Guideline 7 Guideline 8	Work on the promotion of collaboration from a wide-area perspective and the creation of a region with charm and vitality Work on the improvement of convenience through the development and maintenance of social infrastructure and the building of national resilience

1 Creation of added value

Creation and Development of Industries That Produce High Added Value and Acceleration of Digital Transformation

[Creation of Industries with Wide Support Bases Utilizing the Advantages of Monozukuri]

As the automobile industry, which supports the economic base of the whole country as well as Central Japan, is entering a period of transformation, Chukeiren has established CAMIP (Chubu Advanced Mobility Implementation Platform) jointly with Nagoya University. CAMIP's activities began in May 2021, with the aim of continuing to maintain Central Japan as a global center for the travel and transport industry in the future.

Chukeiren is also engaged as a sponsor in the Nagoya University-led COI-NEXT* "Co-Creation Base for My Travel, Connecting Regional Communities to Future Generations." As part of the decade-long activity starting 2022, Chukeiren participates in the development of towns with next-generation travel and transport systems according to the area and climate and, with an eye to the spread and expansion of air-related technologies such as drones, is promoting collaboration with member companies, government, universities, research institutions, and startups. Chukeiren will advance activities aimed at solving social problems and creating new value, like creating and evolving business models, while implementing many projects in society.

*COI-NEXT: "Program on Open Innovation Platforms for industry-academia Co-creation" from the Ministry of Education, Culture, Sports, Science and Technology and Japan Science and Technology Agency (JST)

Next-generation travel and transport event "CAMIP & Map-NAGOYA"

Co-Creation Base for My Travel, Connecting Regional Communities to Future Generations

[Construction of an industry-academia joint research frame contributing to social implementation and international standardization acquisition]

Chukeiren aims to connect the results of research at universities and research institutes with social implementation and international standardization. Chukeiren will keep in view epoch-making industry-academia-government cooperation systems unique to Central Japan. We will bring together human resources, financing, and institutional aspects, to facilitate organically-formed collaborations between universities and research institutions with advanced research capabilities, companies with excellent technological capabilities in the fields of real tech and deep tech, and government.

[Activation of innovation creation, Creation of Startups, Development of Entrepreneurship Education]

Chukeiren promotes open innovation with relevant municipalities and universities with the aim of sustainably developing Central Japan without being left behind by global trends.

Nagoya Innovator's Garage, which opened in July 2019, is a place for creating new industries through co-creation by industry, academia, and government. It is also a base that serves as the core of the formation of an ecosystem that continuously creates new businesses for existing business companies and startups that lead to impacts on society. It offers a wide variety of programs, including

Cross-industrial meeting for next-generation leaders

Continuing Education for Adults to brush up on liberal arts to broaden individuals' values and vision, Beyond the Border 2.0, cultivating human resources which can create practical innovations, and CENT Pitch (Central Japan open innovation pitch), in which startups take the stage with the aim of acquiring funds, peers, and partners. In July 2022, the garage area was expanded to add a space for community building with enhanced mentoring functions to improve the quality and speed of growth of new businesses and startups.

Additionally, the Chairman of Chukeiren serves as the representative of the Central Japan Startup Ecosystem Consortium^{*}, which has been certified as a Global Startup City for the Startup Ecosystem of the Cabinet Office. As a major member, Chukeiren is working to promote and enhance activities to create a startup ecosystem in Central Japan through regional and industry-academia-government cooperation.

*Central Japan Startup Ecosystem Consortium: a consortium composed of Chukeiren, Nagoya University, Aichi Prefecture, Nagoya City, Hamamatsu City, and 214 other bodies, including companies, organizations, and universities.

[Acceleration of Digitalization and Digital Transformation]

To accelerate digitalization and digital transformation, in addition to developing human resources promoting digital implementation, it is necessary to improve digital skills of a wide range of human resources. Chukeiren is running the Central Japan Digital Encouragement website, which presents information about digital skills courses, and hosts lectures and seminars focused on advanced cases of the development of digital human resources and state-of-the art digital technologies.

Digital human resources development seminar in Central Japan(held in March 2023)

Website that provides opportunities for digital learning

[Activities Related to Economic Policies and Social and Economic Systems]

Every year, Chukeiren, keeping abreast of sweeping social and economic trends, conducts research, makes recommendations, and disseminates information about economic policies and social and economic systems focused on important issues for Central Japan. In 2022, Chukeiren published recommendations titled "Toward sustainable economic development through social implementation and the promotion of international standardization—contribution to economic security." In 2023, based on the recognition that the global trend is at a turning point following the COVID-19 pandemic, Chukeiren keeps in mind a Visionary Policy, which describes what Central Japan should become in the future. In addition, Chukeiren publishes a statement every year requesting the government to implement a revision to the taxation system that would support industrial development in Central Japan and empower regional promotion.

The overseas economic delegation's visit to a major incubator facility in France

7

Chukeiren remains aware that the global situation continues to grow more complex and uncertain. To contribute to the enhancement of global competitiveness, Chukeiren is offering lectures covering the latest situations overseas and conducting related studies and discussions. In addition, Chukeiren is working to strengthen collaboration with domestic and foreign international organizations, such as conducting exchange programs with them. In 2022, Chukeiren dispatched an overseas economic delegation to three cities in France and Spain (Paris, Barcelona, Bilbao), resulting in lively and fruitful exchanges of information with local companies and government agencies about startup, innovation, urban planning, community building, and energy situations.

Revitalization of the Local Economy

Chukeiren hosts events that help to discover local products from Central Japan which are attractive, and those whose charms can be enhanced. Not only members including companies and groups, but also non-members including students and non-native residents of Central Japan come into contact with a wide range of local products. With a range of diverse perspectives available, we design activities to discover directions for creating high added value.

Event focused on enjoying the charm of Gifu's local products (held for the first time in April 2023)

Realization of a Carbon Neutral Society

To realize a carbon neutral society, it will be important to utilize hydrogen and ammonia in conjunction with expanding renewable energy sources.

As a participant in the Central Japan Hydrogen and Ammonia Social Implementation Promotion Council, which consists of local municipalities and companies, Chukeiren devised the Central Japan Hydrogen and Ammonia Supply Chain Vision in March 2023. Central Japan is an industrial hub that contains a large number of companies, specialists in industries from manufacturing to logistics. Chukeiren will support them by working to help implement a large-scale hydrogen and ammonia supply chain ahead of other regions in Japan, in cooperation with industry, academia, and government.

Recommendations on the construction of a hydrogen supply chain were developed to request the cooperation of municipalities, and a promotion council was established and reorganized as a result.

2 Cultivation of human capital

Cultivation of Human Capital That Can Exercise Diverse Abilities

In order to respond to major changes including the significant decline in the working-age population, the digital transformation and the green energy transformation, it is important to cultivate human capital which can exercise diverse abilities through industry-academia cooperation. In addition to publishing the report "The Cultivation of Human Resources Through Industry-Academia Cooperation" in March 2023, Chukeiren shares awareness and initiatives in common with industry and academia, and is promoting industry-academia cooperative activities that can contribute to the transformation of the university education system and regional revitalization. Chukeiren also works on career education for university students through the Career Education Co-creation Program* to empower university students to make informed choices about their individual life plans and lifestyles.

*Career Education Co-creation Program is an initiative in which lecturers are sent from member companies to give lectures on themes based on the needs of the universities, with Chukeiren serving as the organizer.

Development of Comfortable Environments to Work and Live in

International competition to acquire human resources is expected. To help make Central Japan a place chosen by foreign people, Chukeiren encourages industry, academia and government to cooperate in what they can offer. Examples include career support for foreign students, and Japanese language education and learning support for schoolchildren of non-Japanese origin. Chukeiren, as a part of efforts to build a multicultural society, works as an intermediary agency that recruits Japanese teaching volunteers from among member companies and matches them with local Japanese language classes, starting from 2022.

Exchange meeting for foreign students and companies

Social and Economic Research

3 Creation of a Region Full of Charm

Promotion of Collaboration from a Wide-area Perspective and the Creation of a Region with Charm and Vitality

[Promotion of Wide-area Industry-Academia-Government Cooperation]

It is important to address issues such as decarbonization, tourism, disaster prevention, and digital transformation through wide-area industry-academia-government cooperation. Chukeiren established the Central Japan Wide-area Industry-Academia-Government Cooperation Council in February 2022 with a view to promoting sharing of industry-academia-government awareness, encouraging problem-solving discussions and promoting solutions. Chukeiren is also promoting activities that produce synergy effects resulting from an industry-academia-government cooperation.

[Promotion of Development of a Region with Charm and Vitality]

To drive Central Japan's sustainable development, it is necessary for each local area to enhance its own appeal to create an inflow of companies and people from Japan and abroad, and address the overconcentration on Tokyo. Chukeiren organizes lectures and study tours with the aim of conducting research and disseminating information about advanced approaches to tourism leading to regional revitalization, and also provides support to the regional development of attractive wide-area tourism through tourism digital transformation promoted by the Central Japan Tourism Association.

Additionally, to achieve a variety of perspectives expressing the region's attractive features, we set up Nadeshiko-no-kai, an association for presenting the charms of Central Japan. The association's members are women who are active in industry, academia, and government in the Central Japan region. The association discusses the charms of Central Japan and disseminates information about them. Events held by the Nadeshiko-no-kai association facilitate networking among female executives and employees.

Through exchange meetings with think tanks^{*} from five prefectures in Central Japan, Chukeiren shares findings and research results on local issues and aims to take collaborative measures.

*Members: Shizuoka Economic Research Institute, Nagano Economic Research Institute, Juroku Research Institute, Hyakugo Research Institute, Chubu Region Institute for

Improving Convenience through the Development and Maintenance of Social Infrastructure and the Building of National Resilience

[Improving Convenience through the Development and Maintenance of Social Infrastructure]

Monozukuri (manufacturing) drives the Japanese economy, and Central Japan contributes greatly to this. However, infrastructure such as roads and ports is still under construction, and further promotion of development is needed. Chukeiren has conducted surveys and studies on the need for infrastructure development in Central Japan and optimal approaches to this, and is promoting activities designed to realize the Vision for the Transportation Network in Central Japan, which was published in March 2022.

For Chubu Centrair International Airport (Centrair), its function as an international hub airport that connects Central Japan to the rest of the world needs to be further enhanced. Chukeiren is promoting the construction of a second runway with a view to responding to future air travel demands,

attaining full 24-hour operation, and handling large-scale runway repairs. In December 2021, a Concept for the Future of Centrair was compiled with local governments. In this plan, a large-scale repair of the current runway will be carried out in two stages. In the first stage, an alternative runway within the airport site will be developed. In the second stage, a new runway will be developed on reclaimed land as a future solution. In addition to promoting the use of the airport and providing support in a variety of issues, Chukeiren supports local organizations in lobbying central government.

In 2020, Chukeiren established the Logistics Round-table Discussions (now the Logistics Committee), to create a vision for 2030 of the advancement of logistics in Central Japan, to identify current issues, and to summarize measures and actions leading to this goal. The committee conducts surveys and studies from different viewpoints, including those of shippers and logistics operators.

Chubu Centrair International Airport (Provided by Central Japan International Airport Company, Limited)

[Building National Resilience to Improve Safety and Security]

Preparation for large-scale disasters, including a Nankai Trough earthquake, is an urgent issue. Chukeiren holds lectures with themes that are highly useful for its members with a view to promoting measures to prevent and reduce disasters. In addition, Chukeiren actively works in cooperation with related organizations in relation to making requests to lobbying the national government.

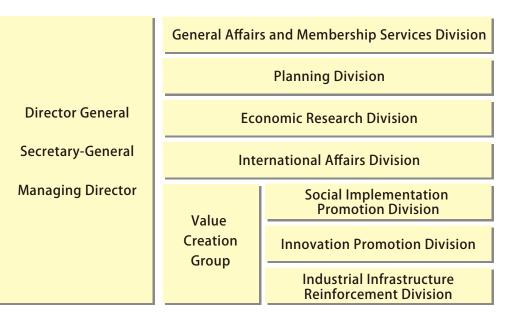

In FY2022, eight economic federations (from Hokkaido, Tohoku, Hokuriku, Central Japan, Kansai, Chugoku, Shikoku, Kyushu) jointly lobbied for a Taxation Program for National Resilience Building, which helped expand and extend the taxation system. It aimed to encourage investments by small and medium-sized enterprises in disaster prevention and mitigation (earthquake-resistant equipment). Chukeiren also followed up and assessed the current position on the recommendations in the May 2019 publication, "For minimizing the impact of a Nankai Trough earthquake, etc. on the business communities of Central Japan" Chukeiren confirmed that infrastructure development was making steady progress, and encouraged continued efforts. Moving forward, Chukeiren will provide support for strengthening the disaster preparedness of each company for major events such as a potentially devastating Nankai Trough earthquake, as well as helping to improve the effectiveness of the Business Continuity Plan, including supply chains.

Strengthening Cooperation with Members and Economic Organizations

Chukeiren holds local member round-table discussions and lectures with up-to-date themes as necessary to strengthen cooperation with its members. In addition, Chukeiren publishes a newsletter, "CHUKEIREN," sends out email newsletters, regularly publishes "Collection of Basic Data for Central Japan" and " Monthly Economic Survey Report", conducts and publishes questionnaires regarding the business situation, and implements other measures to enhance member service.

Chukeiren will further strengthen cooperation with other economic organizations and institutions through activities such as the Tokai Region Economic Round-table Discussions organized with the Japan Federation of Economic Organizations and Federation of Chambers of Commerce and Industry in the Tokai region; the New Year's Celebration of Four Economic Organizations organized with the Nagoya Chamber of Commerce & Industry, Aichi Employers' Association, and Chubu Association of Corporate Executives; and the Western Japan Economic Conferences, which are organized by six economic federations in Hokuriku, Central Japan, Kansai, Chugoku, Shikoku, and Kyushu.

Chukeiren publishes newsletters to keep its members and relevant agencies informed on the latest news and activities. The federation also makes efforts via website and other tools to widely promote its activities and objectives.

Newsletter "CHUKEIREN"

Monthly newsletters sent to members provide the latest information on events and committee activities and key points of Chukeiren's recommendations and requests as well as opinions of members. The newsletter also features special news articles and major economic indices in order to Keeping Members Updated on Central Japan's 5 prefectures.

Chukeiren Mail Magazine

Chukeiren sends a mail magazine to widely share its latest activities.

The mail magazine includes up-to-date information such as a message from the Chairman, recommendations submitted by Chukeiren, an update on activities, an economic survey report "Current Status and Forecast on Business Confidence in Central Japan", lecture and seminar information, and more.

To subscribe, please sign up from the Chukeiren website

Membership Information

- 1. Chukeiren is a comprehensive economic organization covering a wide region, consisting of approx. 760 members including corporations, educational corporations, and economic organizations. The members of the federation may be directly involved in activities for the development of Central Japan.
- 2. By participating in committees and conferences, member opinions may be incorporated in recommendations and requests concerning important governmental policies.
- 3. By attending such events as lectures, symposiums, and networking events, members can access the latest information on internal and external affairs, key policies, projects, etc., and deepen their exchanges with an extensive range of fellow-members.

Membership Fee

Annual Membership (1 unit) •Corporate Membership------¥ 180,000 •Group Membership------¥ 30,000
